800-251-3382  
(931) 486-2296

2. Type: Loading dock equipment Master Control Panel.

#### **B. Product Characteristics: Versa Panel**

1. Interlocked and sequenced operation features for dock leveler, vehicle restraint and overhead door.
2. Options are available to operate the deck and lip independently.
3. Engage and disengage the restraint.
4. Mushroom style "Stop" button provides complete motion freeze of dock leveler, restraint and door.
5. Door function (open/close/stop) controls.
6. Advanced communication package includes LED interior red/yellow and exterior red/green traffic lights, signs and audible alarm.
7. Lockable, rotary style power disconnect standard
8. NEMA12, rating.
9. 115 Volt Single Phase.
10. Size, 8" deep x 12" wide x 24" tall
11. Weight, 20 lbs.

## **C. Function:**

When the door controls are included the door must be opened prior to engaging the restraint and then operating the dock leveler. If door controls are not included the restraint must be engaged prior to operating the dock leveler.

1. Press (momentary contact) the door “Open” button. Allow the door to open fully.
2. Press (momentary contact) the “Hook Up” button. Visually check to make sure the restraint has securely engaged the trailers R.I.G.
3. Press (constant pressure) the “Operate” button for the dock leveler. After the leveler raises fully and the lip extends, release the button and the leveler will drift down to the bed of the truck.
